To: Cyantraniliprole Global Joint Review Participating Countries:  
EPA (United States)  
PMRA (Canada)  
CRD (United Kingdom)  
ANSES (France)  
APVMA (Australia)

Subject: Cyantraniliprole Global Joint Review Dossier – Annex II, Submission of New, Additional and Revised Information

At this time, DuPont is submitting a group of study reports and documents that are either (1) new information; (2) the final reports of interim versions submitted earlier; (3) new information requested by the participating governments; or (4) documents that have been revised in response to comments or requests received from the participating governments.

Items included in the submission are:

Document Name	Document No.	Reason
Cyantraniliprole Technical: Four-Week Inhalation Study in Rats	DuPont-32967	New study in response to a request from PMRA
Cyantraniliprole Technical: Skin Sensitization Test - Buehler Method	DuPont-30418, Revision 1	Revised report in response to a request from EPA
Classification of Cyantraniliprole Technical	DuPont-34049	New document in response to a request from the CRD
Cyantraniliprole Tier 1 Residue Tables	DuPont-33776	New document in response to a request from ANSES
Cyantraniliprole 100 g/L OD plus Codacide Oil: A Study to Evaluate Effects on the Honeybee ( <i>Apis mellifera</i> ) in the Field in Melon in Spain in 2011: Interim Report	DuPont-31672 IM	New study not complete in time for the initial submission
Cyantraniliprole 100 g/L OD Plus Codacide Oil: A Study to Evaluate Effects on the Honey Bee ( <i>Apis mellifera carnica</i> ) in the Field in <i>Brassica napus</i> L. Following Application After and During Bee-Flight in Northern France (Alsace) in 2010 and 2011	DuPont-29571	Final report of an interim report included in the initial submission
Cyantraniliprole 100 g/L OD: A Study to Evaluate Effects on the Honey Bee ( <i>Apis mellifera carnica</i> ) in the Field in <i>Brassica napus</i> L. Following Application After and During Bee-Flight in Southern Germany (Tubingen) in 2010 and 2011	DuPont-29572	Final report of an interim report included in the initial submission

E-SUBMISSION

Information contained herein is part of the DuPont-Syngenta development agreement.

DuPont Crop Protection

Document Name	Document No.	Reason
Field Study to Evaluate the Effects of Cyantraniliprole on Collembola in Germany in 2010	DuPont-29454	Final report of an interim report included in the initial submission

The 4-week inhalation toxicity study and the revised skin sensitization study were submitted to the US EPA and Canadian PMRA in December 2011; and are now being submitted to the CRD, ANSES and APVMA.

All other documents are being submitted for the first time to all countries participating in the cyantraniliprole global joint review.

Sincerely,

Frederick L. Groya, Ph.D.  
Global Product Registration Manager
